DETAILED ACTION

Claims 10-30 are pending.

Election/Restrictions

Applicant's election without traverse of Group III, claims 21-25, in the reply filed on July 1, 2004, is acknowledged.

Claims 10-20 and 26-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention(s), there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 1, 2004.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 21-25 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Brown et al.

Claims are drawn to a food composition comprising Bifidobacterium strain such as Bifidobacterium longum in milk or ice cream, etc. The cfu (colony forming units) are in the range of 10^{11} or less of the Bifidobacterium organisms.

or less of the Bifidobacterium organisms. Note column 3, lines 40-47 and column 4, lines 50-60.

The claims appear to be identical to the disclosed subject matter and are therefore considered to be anticipated by the teachings therein.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

No claims are allowed.
